

Set up a Worm Compost Bin

Brief Description of the Project

Students implement a worm compost bin(s) in their classroom.

Full Project Description

The worm compost bin is used to compost newspaper, fruit, and vegetable leftovers generated from students. Students monitor and maintain the bin throughout the school year.

Note – this is a small-scale (classroom) compost program. For more details on how to set up a classroom worm compost bin check out [Composting at Home - Sustainability Department - San Mateo County](#) or contact sustainability@smcgov.org.
