

Set up a Backyard / Garden Compost Bin

Brief Description of the Project

Students implement a compost bin(s) in the school garden.

Full Project Description

The compost bin is used to compost school yard organic waste and fruit and vegetable leftovers generated from students. Students monitor and maintain the bin throughout the school year. Note – this will be a small-scale compost program. For more details on how to set up a school backyard / garden compost bin – contact sustainability@smcgov.org or check out [Composting at Home - Sustainability Department - San Mateo County](#).
