

## **Waste Reduction Poster Presentations and Healthy Snack Party**

### **Brief Description of the Project**

The classroom teacher invites the principal, parents, and/or other officials to the classroom for poster presentations.

### **Full Project Description**

During these presentations, students review and share with the principal and the parents the actions they took to reduce waste at their school. The presentation can be coupled with a healthy snack potluck party organized by parent volunteers in celebration of their classroom being certified in the waste reduction and recycling pathway.

During this time, the teacher and students can post and share photographs and videos of the classes' work to the Sustainability Department website and social media.
