

LET'S GO ELECTRIC!

The future is electric, and it starts at home. When your gas appliances finally bite the dust, it's time to go electric! Ditch the carbon monoxide, fumes, and mystery smells—modern, all electric appliances keep your home cozy, clean, and safe. Electric appliances remove the main sources of harmful indoor emissions, creating a safer space for you and your loved ones.

Did you know?

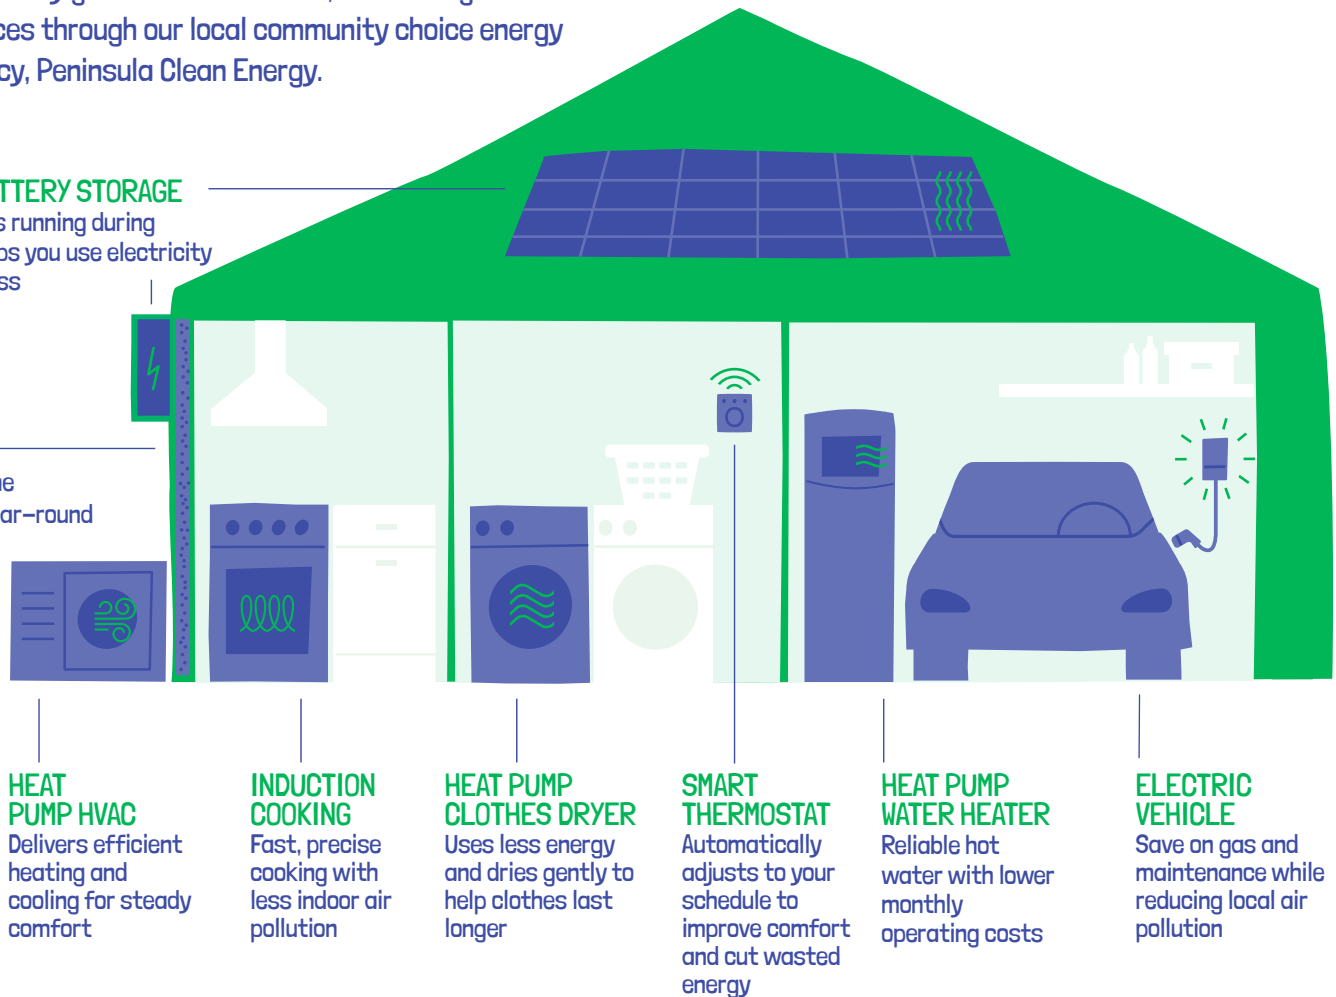

San Mateo County residents get clean, renewable electricity generated from wind, solar and geothermal sources through our local community choice energy agency, Peninsula Clean Energy.

SOLAR AND BATTERY STORAGE

Keeps essentials running during outages and helps you use electricity when it costs less

INSULATION

Keeps your home comfortable year-round and lowers heating and cooling bills

Learn more and find resources to help you make the switch.
