

7th graders in Ms. Low's class at Westborough Middle School in South San Francisco got creative for their final project! They were asked to answer the question, "Does waste ever really disappear?" using the laws of conservation of energy. Next, they identified a specific problem around waste and designed a solution, which resulted in these outreach projects! Here are some of our favorites:

Riley Ly Song: ["Plastic Bottle"](#)

Jonathan Li's Video: [Does our waste ever really disappear?](#)

Sophie Narvarte's Animation: [Does trash ever really go away?](#)
